John Armolir Somerset county maryland merchant wiccocmico river

The person matching your query is almost certainly **John Armour**, a colonial merchant operating along the Wicomico River.

In early Maryland records, hand-written phonetic spellings were common, and older cursive script frequently led to transcription misreadings—meaning "Armour" was transcribed or written phonetically as "Armolir," and the Wicomico River was spelled "Wiccocmico".

Historical and Biographical Details

- **Identity and Profession:** John Armour was a documented **merchant** active in the late 17th and early 18th centuries on the Eastern Shore of Maryland.
- **Location:** He conducted business and owned property in **Somerset County, Maryland**, specifically concentrated around the **Wicomico River drainage area**. During the colonial era, the Wicomico River fell entirely within Somerset County boundaries (the area later became part of Wicomico County when it split from Somerset in 1867).
- **Historical Records:** John Armour's name appears alongside other prominent local colonial figures, landowners, and merchants of the Wicomico area, including Levin Gale, James Gibson, William Merchant, and John Purnall.
- **Context of the Era:** As a merchant along the Wicomico River during this period, his trade would have relied on the heavy riverfront commerce of early Maryland, dealing in goods like tobacco, imported European items, local agriculture, and early maritime provisions.

Ask anything

- **The Somerset County Judicial and Will Records:** Early estate administrations (such as the historical files referencing the Story, Gale, and Dashiell families) detail his commercial partnerships and local debts.
- **Maryland State Archives:** You can find digital copies of the original colonial Chancery Court and Land Office Records to see how his surname shifted between different clerks. Internet Archive +1
